

Quality Assurance Engineer

Location: Barcelona, Spain

To apply, please send your resume, with the **email subject of QA 2018**, to careers-spain@telescope.tv

Job Description

We are looking for a well-rounded QA Engineer to join our team. The ideal candidate would be a quick learner who takes pride in what they do and who will be able to contribute to a diverse group of projects and applications. He or she should be highly motivated and possess a deep understanding of the latest test methodologies and techniques. The QA Engineer will work as part of a team to design, develop, and support a growing number of exciting projects for a wide range of clients, with a focus on web and mobile based user interfaces.

Skills & Requirements

Responsibilities

- Write and execute tests, file bugs, investigate and communicate with our international teams about issues
- Perform manual and automated testing of our web platform
- Configure, execute and monitor load, performance and stress tests
- Develop and maintain automation plans, frameworks, scripts and metrics for functional, regression and integration tests
- Perform initial debugging procedures by reviewing configuration files, logs, databases, and code to determine breakdown source
- Collaborate with the other architects (Java and JavaScript) and developers on identifying, managing and minimizing tech debt in the platform

Position Requirements

- Fluent in English
- Minimum of 2 years of Quality Assurance experience in the software industry
- Experience testing web-based API's via scripting, postman, curl or similar
- Strong test automation programming skills, preferably using JavaScript and/or Ruby
- EU work permit

Nice to Have

- Experience with Jenkins or another CI
- Experience with Java (JUnit, Play), JavaScript (Karma, Jasmine, Angular, Protractor), Ruby, Cucumber

- Familiarity with database systems, both SQL and NoSQL
- Knowledge of the Selenium framework

We offer

- Competitive salary
- Indefinite contract
- Fully stocked kitchen with snacks, drinks, and coffee
- Casual work attire
- Work in a creative, exciting and international company

Current project examples

- Automate testing for all products and services as much as possible using development and scripting in various languages
- Assure correct business logic for voting applications and products, and directly support the world's largest live shows such as: The Voice, American Idol, Dancing with the Stars
- Be constantly involved in support of software usability and functionality of our Connect platform products for all clients

About Telescope

The work environment at Telescope is exciting, engaging, and constantly dynamic. We have major media clients who depend on us year over year to deliver amazing products and support their live TV vote shows. We also have close partnerships with social networks such as: Facebook, Twitter and Instagram to which we deliver fan engagement products.

Telescope Inc. has been responsible for the most successful television and live media participation shows in the last decade: *American Idol*, *The Voice*, *Dancing with the Stars*, *So You Think You Can Dance*, *AMA*, *VMA*. We also work with Coca Cola, NASA, Project Greenlight, and others. We create the software that handles all parts of the voting, and now we are going after social as well. We work with massive scale, big data, and cutting edge technology. Our technical environment is full of passionate employees who enjoy what they do every day.

Telescope is an equal opportunity employer which does **not** discriminate against: race, color, religion, national origin, age, sex, pregnancy, citizenship, familial status, disability, veterans, or any other protected class.
